# Rings

**Every mark, number and track on a dial is a ring.**
**A ring repeats one kind of thing round the centre, at one radius.**

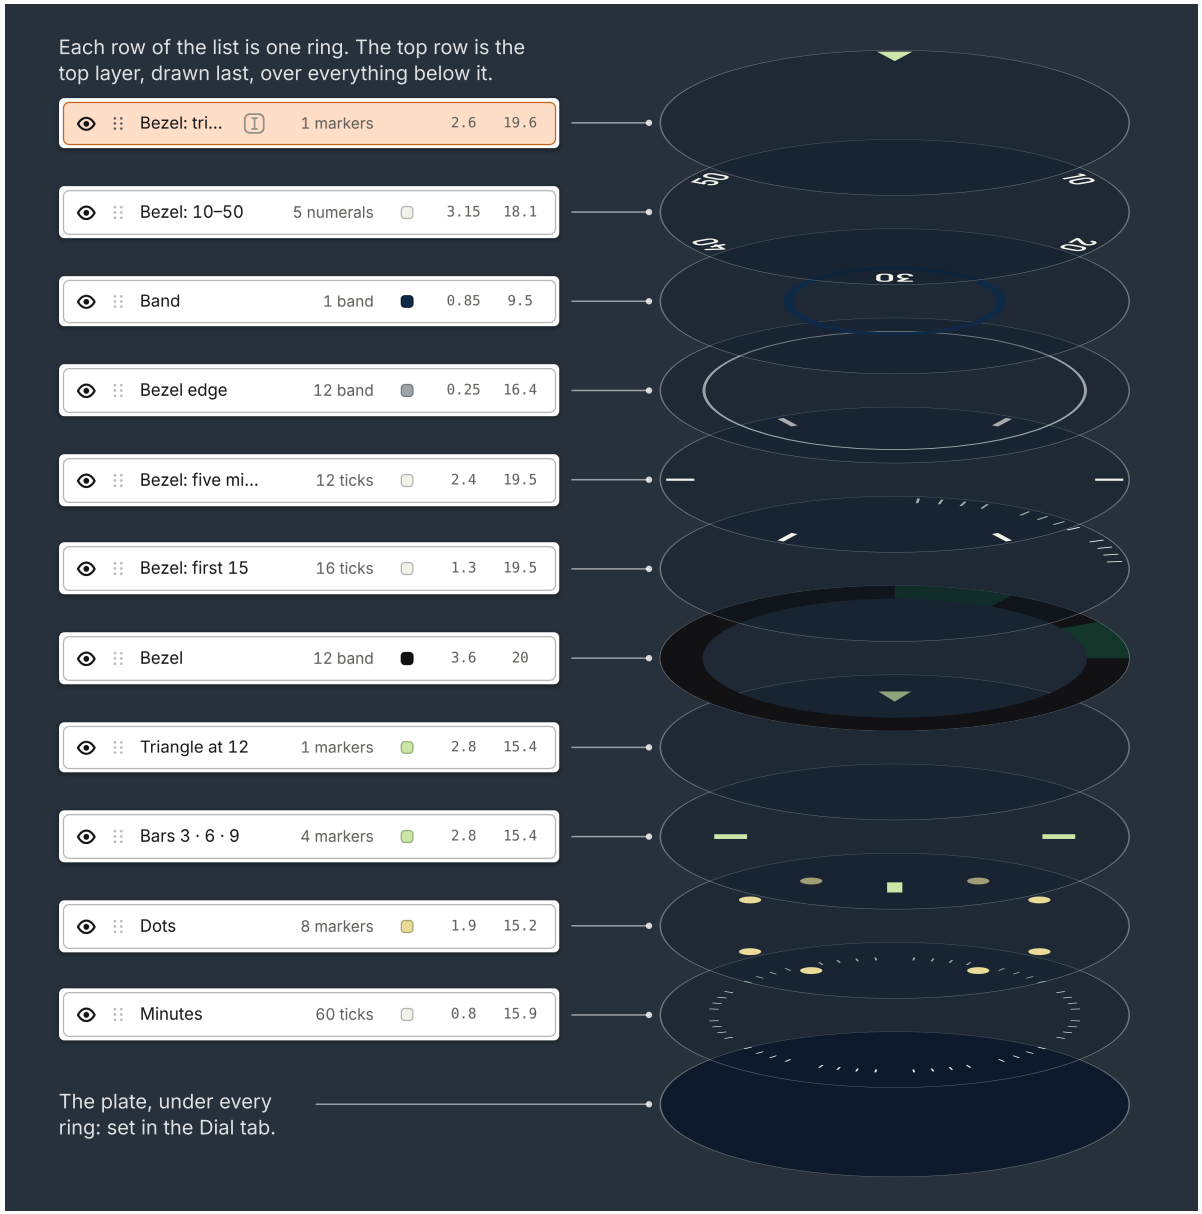

**Ticks.** Lines, as on a minute track.

**Markers.** Heavier shapes, usually for the hours.

**Numerals.** Numbers or words, any font.

**Band.** Flat colour, whole or in pieces.

Each row of the list is one ring. The top row is the top layer, drawn last, over everything below it.

**Order.** The bezel's triangle moved below the bezel: the bezel now covers it.

**Kind.** Dots switched to numerals: same count, same places, now numbers.

**Give way.** Five-minute ticks no longer skip the numerals, so they run under them.

**Anchor.** Centre to top: each numeral moves until its top sits on the radius.
